

Standardised Patient Application Form

For Foundation Doctor & Medical Student sessions

Thank you for applying to assist with our simulations at Frimley Park Hospital.

In our simsuite we run three hour sessions for both medical students and for newly qualified doctors. These consist of several scenarios, usually using one of our high-fidelity manikins that can breathe, has pulses and talks etc, however using a real person for at least one scenario makes the simulation a lot more realistic and enables us to run scenarios we couldn't otherwise. Sadly, for these regular sessions there is no recompense beyond the experience, our grateful thanks and a cup of tea! It will take less than a couple of hours as you observe a scenario before yours plus post-debrief). This is a great opportunity to provide input into the patient experience which they can take forward into their future practice and careers. For further information about our simulations, please read our Standardised Patient Job Description Sheet. Once you return this completed form we will send you further information, including a patient briefing sheet for an appropriate scenario.
