

Epic Electronic Patient Record coming to Frimley Health Update - June 2022

On 11 June 2022 we will be going live with our new Epic Electronic Patient Record (EPR) system, an ambitious programme to transform patient care across all our hospital and community sites.

Having all the information about our patients in one place is an important part of our improvement strategy. Epic will replace over 200 digital and paper-based systems and will hold a complete record for every patient.

We are now close to go live and we would like to ensure that you are up to date with the key information on what Epic means for Primary Care, including what changes it will bring.

What does Epic mean for Primary Care?

As a primary care clinician, referrals processes and requests to Frimley Health will remain largely unchanged. You will continue to receive clinical documentation through the same channels as described below. However, the clinical documentation you receive from us will change significantly, though it will continue to adhere to Professional Record Standards Body (PRSB) standards as appropriate.

This guide makes references to 'Frimley North' meaning Wexham Park-facing GP practices, and 'Frimley South' meaning Frimley Park-facing GP practices.

1. Changes to ICE

Once Epic goes live, ICE will only be used as an ordercomms solution for Pathology and Radiology. It will no longer be used for referrals/information management (currently available for some services in Frimley North).

The table below provides an overview of the timeline of the upgrades for ICE:

Practice location	Access	Dec-21	Jan-22	Feb-22	Mar-22	Apr-22	May-22	Jun-22	Jul-22	Aug-22	Sep-22	Oct-22	Nov-22	Dec-22	Jan-23	Feb-23	Mar-23	Apr-23	May-23	Jun-23	Q3
Frimley South – FPH ICE facing practices	Radiology ICE access	Currently radiology orders are requested manually (except 3 practices)							Will use Wexham ICE from Epic go live of 11 June											Migration to Universal ICE (v8.3) TBC	
	Pathology ICE access	Remain on Surrey ICE instance – currently on v6.3																			Migration to Universal ICE (v8.3) TBC
Frimley North – WPH ICE facing practices	Radiology ICE access	Will remain on Wexham ICE (currently v6.2.0) until 16 April					Will remain on Wexham ICE (upgraded to v6.2.3) on 16 April														Migration to Universal ICE (v8.3) TBC
	Pathology ICE access																				Migration to Universal ICE (v8.3) TBC
ICS system wide	Epic Care Link (GPs view of Epic)								Epic goes live on 11 June (including the Epic Radiant module) GPs will continue to use ICE (above), ICE will send radiology orders to Epic and then results back to ICE for GPs EpicCare Link (GP view of Epic system) will be available to practices that register.											Migration to Universal ICE (v8.3) TBC	
	Rad-Alert	*Currently in business case development phase (interim process in place via generic email addresses – see drafted SOP)																			
	I-refer	*i-refer (radiology decision support tool) feasible with v7 or v8																			

1.1 Pathology and ICE

Pathology will continue to be ordered through ICE with results being returned via ICE into GP Practice systems.

1.2 Radiology and ICE

- Radiology requests will be via a single (upgraded) version of ICE in both Frimley North and South (as shown in the table above).
- For **Frimley South** - practices can make Radiology requests through ICE, you will no longer use paper requesting for Radiology. Your practice will receive new staff codes for Wexham Park ICE requesting.
- **Frimley North** practices will continue to log in as usual for requesting Radiology.
- The upgraded version of ICE will have a more comprehensive catalogue (see example of the changes below).
- To allow ICE Radiology requests to be compatible with Epic, some rules / alerts have been simplified within ICE. It is therefore even more important that Primary care are familiar with referral criteria e.g., for U/S and X-ray, prior to requesting. These referral criteria can be found on DXS under the Radiology Frimley Health folder and on the relevant DXS speciality pages. There are also limited scenario's where MRI/CT would be approved (see Radiology DXS landing page).
- For appointed procedures (e.g., ultrasound) you will need to indicate which hospital site you/patient prefers the test to be done.
- Radiology results will continue to be reported via ICE into practice systems e.g., EMIS, therefore it is vital that all practices set up the new trading partner code **This needs to be completed in advance of the EPIC go-live on June 11, 2022.** The risk to this task not being carried out will prevent Radiology reports being returned to your practice system. Please follow the link for practice instructions on how to do this. To find instructions on how to do this please go to: <https://www.fhft.nhs.uk/gps/gp-centre/epic-epr-at-frimley-health/>
- **Help and Support ICE/Radiology Ordercomms during Epic Go Live.** If GPs experience any ICE related issues for Radiology order comms during the Epic go live period, please e-mail fhft.iceepicsupport@nhs.net, which will be monitored by BSPS / Frimley-Epic team from 9-5 Monday to Friday. If urgent, please call BSPS: on 0300 613 3600.

1.3 ICE Referrals - Frimley North GPs only

From 11 June the referrals functionality in ICE will no longer be available

The table below shows the service route closing on ICE and the alternative route to access these services e.g., via a new email address or eRS service. For those services highlighted in green, we would encourage you to **start using these services with immediate effect (rather than ICE)**.

Speciality	Service route closing on ICE	Alternative route to contacting Service - to use from the 11th of June (or sooner if showing in green)	New Service Route Opening Date
ENT	Nasal Fracture & ENT SHO Emergency Clinic	fhft.entemergency@nhs.net	Live from 11th June
Gynaecology	EPU & Gynae Emergency Clinic	fhft.earlypregnancyandugccwph@nhs.net GPs can also call 0300 615 4429. Please note, the phone line is managed by the clinical team so it may not be answered straight away. For further service details click on link: https://www.fhft.nhs.uk/gps/gp-centre/sdec-including-ambulatory-care/	Live from 11th June
Cardiology	GP Cardiology Diagnostic Request	To come in via the Cardiology RAS Triage service	Live Now
	Rapid Access Syncope	Service on eRS - Rapid Access Syncope Triage Service	Live from 11th June
Respiratory	AIRS (Adult Integrated Respiratory Service)	Service on eRS - Respiratory Medicine Adult Integrated Resp (AIR) Triage	Live Now
	Tuberculosis Clinic Referrals	Service on eRS - Tuberculosis Triage Service	Live Now
Occupational Therapy	OT Rheumatology/ Hands - OP	Service on eRS - Hand Therapy Triage Service	Live Now
Physiotherapy (Adult)	Physio- OP Amputee's	Service on eRS- Physiotherapy - Triage Service	Live Now
	Physio Walking Aid Referral	Service on eRS- Physiotherapy - Triage Service	Live Now
	Physio MSK (Adult)	Service on eRS- Physiotherapy - Triage Service	Live Now

Speciality	Service route closing on ICE	Alternative route to contacting Service - to use from the 11th of June (or sooner if showing in green)	New Service Route Opening Date
Physiotherapy (Adult)	Physio Neuro (Adult)	Service on eRS - Physiotherapy - Neurological Triage	Live Now
	Physio Obstetrics	Service on eRS - Pelvic Health (Obstetric/Urogynae/Colorectal) Triage service	Live Now
	Physio Uro-Gynae	Service on eRS - Pelvic Health (Obstetric/Urogynae/Colorectal) Triage service	Live Now
Physiotherapy (Paediatrics)	Physio MSK (Paediatric)	Service on eRS - Physiotherapy - Paediatric Triage	Live Now
Other			
Death Notifications*	All Departments	GP notification of death letter built within Epic. Once completed the letter will be sent via docman to the appropriate GP recipient. *	Live from 11th June
Acute Kidney Injury	Not a Referral only link to advice	This is not a referral; it was advice for GPs on how to support AKI's - A&G is available for Nephrology on eRS & guidance will be added to DXS / FHFT GP Centre.	New location of guidance to follow

* Frimley South practices currently receive death notifications via email. In line with the new Frimley North process, they will also receive death notifications through this new form on Epic that will be sent to practices via Docman.

2. Referrals (and Advice and Guidance)

Please continue to refer via the usual routes which are predominately via eRS. If you are unsure, please see information on the FHFT GP Centre [Referrals & key contacts | NHS Frimley Health Foundation Trust \(fhft.nhs.uk\)](#) or email: fhft.gpcommunications@nhs.net.

2.1 Services on eRS

In preparation for Epic, the existing eRS CAS (**Clinical Assessment Services**) will be moving to eRS RAS (**Referral Assessment Services**). This means you will no longer need to book your patients into fictitious appointments, you will just need to select 'Send for Triage' on the selected triage service which we hope is positive news for everyone. We will communicate these changes via the usual channels: GP Bulletin/ICS Referral Management Teams Channel.

2.3 Triage and the booking of patient's appointments

Currently when a GP refers via eRS the referral is triaged by clinicians in the service location i.e., Wexham or Frimley. When Epic goes live all referrals for a particular speciality will be grouped into one triage work queue. This means that patients will have access to appointments at all our Frimley Health sites for that service (providing appointments are available). Patients will be assigned predominantly by their location, but they may be offered (and can choose) to travel further e.g., for a shorter wait.

3. Discharge summaries and outpatient letters

Discharge summaries and outpatient letters will be generated in Epic and will be PRSB compliant. They will continue to be delivered to GPs via Docman.

	
<p>Committed to excellence Working together Facing the future</p>	
Re: ORDERS, Thomas DOB: 17/9/1954 , Gender: male NHS No: 446-45-7721 MRN: 203028	Address: 134 Elm Street Madison United States of America 53706
Admission date: 18/1/2022 Admission time: 10:06 Length of stay: 101 days	Reason for admission: Admission method: Emergency - A&E, Casualty, or Dental Casualty Department Source of admission: Usual Place of Residence
Date/time of discharge: Discharge method: Discharged with Clinical Consent Discharge type:	Discharging consultant: STERN, JEREMY Discharging specialty: Respiratory Medicine Discharge location: FPH F14
Social context Living Arrangements: Spouse/significant other Support Systems: Spouse/significant other, Friends/neighbors Assistance Needed: none	

Patients will also receive a patient-friendly after visit summary:

AFTER VISIT SUMMARY

Thomas ORDERS MRN: 203028  Pneumonia  24/1/2022 - 2/3/2022  Frimley F14

Instructions

 Your medication has changed

-  **START taking:**
levofloxacin
xylometazoline
-  **CHANGE how you take:**
atorvastatin
cetirizine
-  **STOP taking:**
salbutamol 100micrograms/actuation dry powder inhaler

Review your updated medication list below.

Your Next Steps

 Ask

- Ask how to get this medication

4. FHFT EpicCare Link

FHFT EpicCare Link is a **real time, read only** secure web-based portal that grants our community members (including primary care clinicians and teams) real-time web access to view their patient's Frimley Health chart. GPs can use EpicCare Link to drill into clinical visits that occur at the Trust to view discharge summaries, medication changes, notes, results, and more.

In EpicCare Link, you will also be able to see notes, encounters, medications, allergies, and problems documented at other Epic NHS trusts:

- Currently live on Epic: Cambridge, Royal Devon & Exeter, University College London, Great Ormand Street Hospital.
- Future Epic sites: Manchester (Autumn '22), Guy's & St Thomas' (Spring '23), Northern Ireland (Spring '23), and the Royal Marsden (Spring '23).

Each FHFT EpicCare Link site will have at least one site administrator whose role will include requesting and monitoring user accounts for that site / practice.

EpicCare link registration opened on 28 April - please follow the below link to register.

<https://www.fhft.nhs.uk/gps/gp-centre/epic-epr-at-frimley-health/>: Click on the login button on the webpage to submit registration details.

The deadline for a log in in place for Go live was 20 May. Any requests after this date will receive access after go-live. Additional FAQ's and a Quick Start User Guide for GPs has been created for EpicCare Link and will be made available on the website:

<https://www.fhft.nhs.uk/gps/gp-centre/epic-epr-at-frimley-health.>

EpicCare Link Icon on Desktops in Primary Care

We are working with the Frimley ICS Digital team to install the Icon for EpicCare Link. We will provide further updates when this has been actioned as we are aiming to have this in place for go live. Please note you will only be able to use this Icon and log in (from 13 June) providing you have registered your practice and received logins.

5. Further Support & Next Steps

If you have any questions, please email the EPR team at fhft.epr@nhs.net. For further information on Epic please visit the FHFT website: <https://www.fhft.nhs.uk/gps/gp-centre/epic-epr-at-frimley-health/>

Other Key contacts (see Frimley Health Key Contacts on the concertina):

<https://www.fhft.nhs.uk/gps/gp-centre/referrals-key-contacts/>.

Help and Support ICE/Radiology Ordercomms during Epic Go Live.

If GPs experience any ICE related issues for Radiology order comms during the Epic go live please e-mail fhft.iceepicsupport@nhs.net, which will be monitored by BSPS / Frimley-Epic team from 9-5 Monday to Friday. If urgent please call BSPS on 0300 613 3600.
