

TNA Programme
27th November 2023

HCSW Academic Study Day 1

Suzy Thompson, Library Services Manager
Frimley Health NHS Foundation Trust

Morning session 9:00am – 10:15am

1) Library services & resources

- Locations, contact details, opening times & facilities
- Joining the library
- Services – loans, document supply, current awareness, training
- Resources – books, ejournals, the Knowledge & Library Hub, and other online resources via NHS OpenAthens
- Website & dedicated Apprenticeship Programme webpage

2) Literature searching

- Types of information
- Hierarchy of evidence
- Google – pros & cons
- Using the Hub – searching, filtering and saving results

Facilities

- Books
- Self-service book loan unit
- 18 desktop PCs
- Wi-Fi
- 2 study pods
- Quiet zone / wellbeing area
- Waterside garden

Library registration

To use the full range of services, sign up as a member of the library...

Go to:

<https://swims.inforlib.uk/iguana/www.main.cls?surl=online-registration>

Or scan the QR code

Select “Camberley” to register at Frimley Park, or “Slough” to register at Wexham Park

Registration

Membership type Personal data Confirmation

Select library location:

To ensure that your registration form is received by the correct library please choose your local library from the list below.

- Camberley Frimley Park Hospital FRM
- Torquay Torbay Hospital TOR
- Bath Royal United Hospital W14
- Bournemouth Royal Bournemouth Hospital D02
- Dorchester Dorset County Hospital D08
- Poole Hospital D01
- Portsmouth Hospitals University NHS Trust H27
- Slough Wexham Park Hospital WXM
- Southampton Moorgreen Hospital H05
- Taunton Musgrove Park Hospital MPH
- Yeovil District Hospital YDH

Services

Book loans

Members can borrow up to **12 books** at a time. The loan period is **4 weeks**, and can be renewed **3 times** (as long as the book hasn't been reserved).

Interlibrary loans

If you need a book which isn't available in our libraries, we can request it for you from another library. **Email us** with your request, or submit the request via our **online form** at:

<https://forms.office.com/r/5zsA6B0His>

Document Supply

You can also **request articles** from us using the online form, if unavailable through our online resources.

A screenshot of the NHS Frimley Health online form for requesting a book or article. The form has a blue header with the NHS Frimley Health logo and the text "Request a book or article". Below the header, there is a question: "1. Is your request for a book or journal article?" with two radio button options: "Book" and "Journal article". A "Next" button is located below the options. At the bottom of the form, there is a disclaimer: "This content is created by the owner of the form. The data you submit will be sent to the form owner. Microsoft is not responsible for the privacy or security practices of its customers, including those of this form owner. Never give out your password." and a footer: "Powered by Microsoft Forms | Privacy and cookies | Terms of use".

Current awareness

Keep up to date with the latest research and publications in your chosen field of interest. Sign up for a **KnowledgeShare** account at <https://forms.office.com/e/u1wya4XxNj>

or scan the QR code.

Training

We offer face-to-face/virtual 1-to-1 and group training sessions in:

- **Finding the Evidence** – Accessing and searching online databases
- **Introduction to critical appraisal** – Basic tools and statistics
- **Study Skills** – Referencing, academic writing etc.
- **Health literacy** - coming

Accessing online resources

To access ebooks and all our other online resources, you will need an **NHS OpenAthens** account...

- It's a **single sign-on username & password** that gives you free, secure access to a range of high-quality online resources from NHS collections, including:
 - E-books
 - Journals
 - Healthcare databases
 - E-learning
 - Digital reference tools
 - Decision support tools
- You can access these resources **wherever, whenever you need**, from any connected device at work, while studying and at home, **24/7**.
- Your account is affiliated with your organisation; if you move to another Trust, you can take your OpenAthens account with you and update it with your new organisation's details

Registering for an OpenAthens account

1) Go to <https://openathens.nice.org.uk/> and fill in the registration form:

Use your **trust nhs.net** email address to speed up the registration process

Enter your employing organisation e.g. "Frimley Health NHS Foundation Trust"

The screenshot shows the registration page for NHS England OpenAthens. At the top left is the NICE logo (National Institute for Health and Care Excellence) and at the top right is the OpenAthens logo. The main heading is "Register for a NHS England OpenAthens account". To the right of this heading is a link "Already have an account? Login". Below the heading is a note: "Please note that you need to activate your account before you can use it. Please read the information on the page you'll see after you have submitted this form, and check your inbox for your activation email." There are two links: "Help me to complete this form" and "More Information". The form fields are: "Please enter your name" (First name and Last name), "Please enter your professional / work / student placement email address" (with an example "e.g. you@your-organisation.org.uk"), "Please enter your organisation. Students enter your student placement organisation" (with a dropdown menu "Start typing and select from the choices given"), "Full work / placement address", "Work telephone number", "Please enter the name of your department, ward, GP practice or clinic" (with a dropdown menu "..."), and "Position / job title". On the right side, there are two informational boxes. The top one states: "This registration page can only be used to create OpenAthens accounts for NHS England users. Users from Wales, Scotland and Northern Ireland should access the relevant service using the links below:" followed by a list: "Scotland", "Wales", and "Northern Ireland". The bottom one states: "To help the approval of your application, if possible:" followed by a list: "register using your work email address" and "register from your workplace". Below that, it says: "If we do not recognise your email address or the location that you're registering from, an NHS OpenAthens administrator will need to assess your details and decide whether you meet the eligibility criteria. To enter your organisation, please start typing the name of your organisation in the box. Wait a couple of seconds for a list of options to".

2) You will then receive an activation email to complete the registration process

Accessing OpenAthens resources

Three different ways to access online resources with your OpenAthens account...

- 1) Login to your **NHS OpenAthens account** at <https://openathens.nice.org.uk/Auth/Login> and click on *My resources*...

Then select a resource from the list.

All topics are updated as new evidence becomes available and our peer review process is complete.
Literature review current through: **Oct 2023**.
This topic last updated: **Aug 03, 2023**.

INTRODUCTION

The main goals of asthma management are to optimize control of asthma symptoms and reduce the risk of asthma exacerbations while minimizing medication adverse effects. It is expected that a person with well-controlled asthma should be able to participate in work, school, play, and sports without limitation due to breathing. The four essential components of asthma management are patient education, minimizing exposure to asthma triggers, monitoring for changes in symptoms or lung function, and pharmacologic therapy. This overview topic presents the goals and components of asthma management. It is applicable to both children and adults. The recommendations are based upon major published asthma guidelines [1-4].

The diagnosis of asthma and more detailed management issues are reviewed separately. These topics are divided by age and, for adults, severity of asthma symptoms (table 1). The management of asthma exacerbations is also covered separately.

Asthma diagnosis and evaluation:

- (See "Asthma in children younger than 12 years: Initial evaluation and diagnosis".)
- (See "Asthma in adolescents and adults: Evaluation and diagnosis".)
- (See "Diagnosis and management of asthma in older adults".)
- (See "Evaluation of severe asthma in adolescents and adults".)
- (See "Severe asthma phenotypes".)

Detailed discussions of nonpharmacologic asthma management:

- (See "Asthma education and self-management".)
- (See "Trigger control to enhance asthma management".)

Topic Feedback

- Presents comprehensive syntheses of the evidence, followed by actionable recommendations

Last reviewed: 22 Jul 2023 Last updated: 17 Jan 2023

Summary

Sepsis should be suspected in an acutely deteriorating patient in whom there is clinical evidence or strong suspicion of infection. Have a low threshold for suspicion.

Think 'Could this be sepsis?' whenever an acutely unwell person presents with likely infection, even if their temperature is normal. Remember that sepsis represents the severe, life-threatening end of infection.

The key to improving outcomes is early recognition and prompt treatment, as appropriate, of

BATES' VISUAL GUIDE TO Physical Examination®

Abstract

This title is a practical and comprehensive guide to the management of the acutely ill patient. It is a single source to the most up-to-date therapies and protocols. It presents the most recent treatment guidelines and evidence-based content that is up-to-date with the recent advances in clinical medicine. Topics covered include cardiac emergencies, respiratory emergencies, gastroenterological emergencies, renal emergencies, shock, neurological emergencies, infectious diseases, emergencies in human immunodeficiency virus, diabetes and endocrine emergencies, haematological emergencies, rheumatological emergencies, dermatological emergencies, psychiatric emergencies, drug overdoses, and practical procedures in acute medicine.
